

Cultivate + co.
Capability Statement 2026

"Landscapes today need to do more - to feed us, nourish us + connect us while supporting the flora + fauna around us and building a more resilient world. It's a big ask but with intelligent design, anything is possible."

Robyn Renton

Cultivate + co. is specialist landscape architectural practice based in Perth, Western Australia. We provide consultancy and design solutions focusing on urban rewilding, rural regeneration and cultivating community.

What we do

At **Cultivate + co.**, we work across a diverse array of projects, including residential, rural, commercial, educational + community spaces. We support the delivery of projects through every stage - from initial brief development + planning, design + documentation, project support during construction and maintenance + post installation review. Our collaborative approach involves close partnerships with clients + communities, allowing us to develop intelligent, adaptive design solutions that thoughtfully address each site's unique challenges and complexities.

Acknowledgement of Country

Cultivate + co. acknowledges the Traditional Custodians of the land on which we work and live, the Whadjuk Noongar people, and we pay our respect to Elders past and present.

Our approach

We create landscapes that are not only **resilient** and **regenerative**, but also **enriching** and **purposeful** for the people who inhabit them. We seek to create landscapes that deliver positive environmental outcomes, with a focus on biodiversity, local food production, permaculture principles, waste minimisation, and water sensitive urban design (WSUD).

Embedded in Western Australia's unique environments, our work reflects a deep understanding of the region's landscapes—its climate, soils, flora, and fauna. Our aim is to create...

healthy landscapes

Prioritizing safety, play, wellbeing and inclusivity

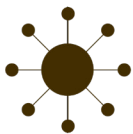

resilient landscapes

Integrating climate resilient measures into every project

biodiverse landscapes

Restoring and maintaining natural ecosystems

intelligent landscapes

Ensuring projects are adaptable with a focus on long term benefits

Our services

At Cultivate + co. we believe every landscape has its own story, opportunities and challenges. Our approach is personal and considered, working closely with each client to create landscapes that are **healthy, biodiverse, resilient + intelligent**. Whether you are creating a garden around a new home, managing a rural property, developing a community project or looking for specialist native planting knowledge, we tailor our services to suit your needs.

From an initial consultation through to detailed design and construction support, you'll work directly with a project lead throughout the process. We value in person conversations, thoughtful design + the opportunity to refine ideas together, creating landscapes with character, purpose + soul. For rural projects where distance or budget may make regular site visits impractical, we use online meetings, email and video conferencing to maintain clear and consistent communication throughout the design process.

We pride ourselves on **hand-drawn** sketches, perspectives and plans that bring ideas to life and create a sense of character within the design process.

We work across the Perth metropolitan region as well as Perth hills, Wheatbelt + south west regions of Western Australia. Our clients are:

- Urban property owners
- Rural property owners
- Commercial businesses + public sector clients
- Aligned industry professionals (Architects, Planners, Urban Designers)
- Community and Not for Profit organisations

Commercial + Development

Cultivate + co. has experience working across a range of commercial and public-sector projects, including education, healthcare, parks and playgrounds.

We can assist with landscape concept plans and landscape documentation required to support planning and development applications, while also providing specialist knowledge around native planting and landscape resilience.

We enjoy working as part of a broader design team and collaborating with architects, planners, developers and other consultants from the early planning stages of a project.

Early collaboration allows landscape, architecture, site planning and infrastructure to be considered together, helping clients make informed decisions from the outset. We believe this integrated approach creates stronger design outcomes for the people who use and experience these spaces, with thoughtful connections between buildings and their surroundings, seamless indoor-outdoor spaces and landscapes that feel genuinely connected to their place.

Specialist Native Planting Expertise

Cultivate + co. is always open to working alongside other landscape architects, designers and industry professionals where specialist native plant knowledge is required.

We can provide support with planting design for larger projects and contribute as a specialist sub consultant offering native planting knowledge to a broader design team. Whether you need specialist input for a single planting area or ongoing support throughout a larger project, we can tailor our involvement to suit your needs.

We understand that every practice has its own systems and workflows, and are happy to work collaboratively within existing project teams and design programs. Regular meetings, either online or in person, help ensure clear communication and a collaborative approach from concept through to completion.

Not-for-Profit + Community Groups

Cultivate + co. is passionate about helping community groups + not-for-profit organisations turn landscape ideas into meaningful places. We understand that community projects often need to work within limited budgets and funding requirements. We can assist groups to develop a clear landscape vision and, where appropriate, provide support with grant applications and project planning.

We can assist with community garden design, revegetation projects, community workshops + presentations, as well as planting days + specialist native planting advice.

We enjoy working alongside communities to create landscapes that are not only beautiful, but useful, inclusive and connected to the people and place around them.

Who are we?

A collective of skilled and imaginative and experienced professionals shaping meaningful landscapes.

Robyn Renton

Director + Registered Landscape Architect

...and an avid gardener, outdoor enthusiast and mother of two energetic young boys.

Robyn is an experienced, highly creative landscape architect with over 20 years working in Perth and overseas. Having grown up in Perth, studied locally, and now living with her family in the Perth Hills, Robyn has developed a deep understanding and appreciation of the Western Australian climate, soils, and native flora.

Robyn has specialist expertise in plants, particularly species endemic to Western Australia, and a deep understanding of how to use them effectively to provide shade, food, privacy, visual amenity, habitat, and enhanced biodiversity.

Her experience spans from intimate residential spaces through to large-scale commercial projects across a broad range of sectors, including education, healthcare and therapeutic environments, as well as play, recreation, and community collaboration.

Robyn has been fortunate to lead and collaborate on innovative, interdisciplinary landscape architecture that deliver strong community and environmental outcomes. She works effectively alongside engineers, architects, and builders as part of integrated design team.

Key Projects Robyn has been involved in

Development WA - WGV Project in White Gum Valley

Development WA - Perth Cultural Centre - Urban Orchard Community Planting Days

QV1 - Rooftop Community Garden

Shire of Kwinana - Kwinana Adventure Park

Geocatch - Bay OK Guidelines

Robyn's Qualifications

- Bachelor of Landscape Architecture with Honours University of Western Australia (2006)
- Chartered Member of the Landscape Institute, UK (2010, however not maintained membership)
- Registered Landscape Architect with Australian Institute of Landscape Architects (AILA) (since 2012) Registration No. is 001788.

Associations + Memberships

- Australian Institute of Landscape Architects (AILA)
- WA Landcare Network
